EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with L. Graham, esq., on 05/12/2006.

The application has been amended as follows:

Cancel claims 1-23, 35-41.

In claim 29 after the words "a source of ozone/water connected to the wand;" insert --- the wand further including---

In claim 29 after the words "a second discharge nozzle connected to the outlet of the second conduit" insert ---, wherein the wand is configured to discharge the high pressure water and ozone/water simultaneously .

Response to Applicant's amendment

2. All previous rejections and objections have been overcome by the amendment and clarifications, filed 02/28/2006 in combination with the Examiner's amendment and the objections and rejections are withdrawn.

Allowable Claims

3. Claims 29-33 are allowable over the prior art of record.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance: the closest prior art of record is Kasting, Jr. et al (U.S. 6,455,017). Kasting teaches an apparatus for washing and sanitizing the variety of surfaces. The apparatus of Kasting comprises hand held wands, each having a conduit with an inlet and outlet, a discharge nozzle, connected to the outlet, and sources of high pressure water and ozone/water, connected to respective wands. The apparatus of Kasting is configured to discharge high pressure water followed by discharging ozone/water. The teaching of Kasting fails to anticipate or suggest fairly the apparatus, having structural elements, which are configured to discharge high pressure water simultaneously with ozone/water. Upon further search no other prior art that anticipates or suggests fairly the cleaning system with the combination/configuration of structural elements as instantly claimed has been located as of the date of this office action. Therefore, claims 29-33 are allowed over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
